

Enrollment Projections

FORM 2.a.1

SECTION 2.a

"ENROLLMENT" Information

INSTRUCTIONS:

- 1. Complete district-wide cohort-survival table incorporating five year historic enrollments and live birth data.** Cohort-survival table is available on the LRFP Project Website under "Download Docs." If another database is believed to better represent likely future enrollments in the district, it may be used if supporting documentation justifying its validity is provided. However, a projection based on the five year data base must also be completed although the data will not be entered into the LRFP Project Website.
 - 2. Enter historic and projected enrollment data for all general and special education students below.** Data must match cohort-survival projection table, with "projected enrollment" consistently taken from one projection year. Projected enrollments should be based on fifth year projections unless the district notes extenuating circumstances.
- NOTE: Areas shaded in grey are automatically calculated on the project website but are provided for reference if desired.

FORM 2.a.2

INSTRUCTIONS: Enter enrollment data for each existing school based on current grade alignments. Projected totals for all schools should equal district-wide enrollment projections.

NOTE: Areas shaded in grey are automatically calculated on the project website but are provided for reference if desired.

[illegible]

NOTE: If PK is not listed as a separate entry on the LRP website, add PK enrollment figures to K-12 general education. Retain PK figures for record purposes.
